
RESEARCH PROGRAM: THE CENTER FOR PRODUCE SAFETY - UPDATED FEBRUARY 18, 2019
Grower's Risk Assessment Biomarkers Investigative Tool (GRABIT) Application

Applications – Due by 12:00 noon PDT on Monday, April 22, 2019
Send application and participation availability confirmation form to:
research@centerforproducesafety.org

The Center for Produce Safety (CPS) is a 501(c)(3), U.S. tax-exempt, charitable organization focused exclusively on providing the produce industry and government with open access to the actionable information needed to continually enhance the safety of produce.

CPS extends this invitation to participate in the GRABIT Award Challenge with unencumbered retention, by all applicants, of full invention ownership and protection of proprietary knowledge and trade secrets, regardless of the final award decision. CPS asserts no rights to a licensing position or participation in any commercialization opportunities. All rights remain with the institution, organization, business entity, or individual inventor. However, all applications must contain sufficient technical information on biomarker(s) selection, sampling protocols, detection platform, and digital data capture, display, and storage. In the eventuality that additional information is required of the applicant, to fairly and appropriately evaluate the technical merit and status of performance readiness for deployment, an arrangement will be made for a confidential, verbal exchange between the inventor and the review panel.

Send all questions regarding protection of intellectual property and confidentiality to
research@centerforproducesafety.org

All sections below are required for a complete proposal package: Use a sans serif font (Arial or Calibri preferred) no smaller than 11 point. Use 1-inch margins on all sides and single line spacing. Number all pages. The completed application may not exceed 5 pages. Send in .pdf format. CPS may also request a Word file.
