

Job Description

Position Title: Sanitation Manager

Reports to: Food Safety / Quality Manager

Exempt/Non-Exempt Status: Exempt

Job Title Description: Sanitation Manager

Division: Taylor Farms Northwest Kent, WA

Job Description: The Sanitation Manager will monitor and supervise the cleaning of the plant production equipment and facility to meet food safety, customer quality and worker safety requirements. The position will ensure employees follow Company policies and procedures, ensure that sanitation, quality and department efficiencies are maintained at or above standards, and support the commitment and continual improvement to Food Safety and Quality programs. Ensure proper staffing is available to efficiently conduct sanitation activities, including dishwashers, sanitation, janitorial and housekeeping. Handle employee scheduling, conflict resolution, corrective action, interviewing, etc. The manager will communicate regularly with other production facility departments using inter-company email system (Outlook). This position works closely with the QC manager on sanitation related budget elements, and to ensure all USDA and HACCP requirements are met on a nightly basis. Responsible for supporting food safety and quality in the plant.

Requirements:

- 5+ years' supervisory and sanitation experience in a food processing facility; preferably a vegetable processing facility.
- Understand and have knowledge of chemicals used in the cleaning process; understand the manufacturing process and equipment parts/systems in order to ensure proper sanitization of equipment and efficient line start-ups.
- Understand and have knowledge of GMP, SQF audits, FDA, PMO, HACCP, and OSHA requirements.
- Ensures that employees and managers have the required food safety, sanitation, and occupational safety training
- Ability to work in a refrigerated environment, 36-degrees
- Use of rubber and latex gloves
- Must speak, read and write English fluently
- Must be able to pass a pre-employment drug test
